-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Prosecution is hereby reopened. A new ground of rejection is set forth above. A Technology Center Director or designee must personally approve the new ground(s) of rejection by signing below:

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Slipp et al. (GB 160,098) in view of Allsop et al. (US 1,412,592). Claim 9 corresponds to claim 5 which was affirmed as being a proper rejection. Examiner invokes res judicata with respect to the claimed features affirmed in that rejection. Newly amended claim 9 adds the feature of location means connected to said axle for locking pegs in a second operative position. Allsop, another device capable of supporting baby bottles, discloses that feature at page 1 line 67 through page 2 line 17. The axle (hinge) is shown at reference characters 4 , and figure 2 shows the operative positions. Spring 6 is connected to hinge 4 via pivoted rib 3 and locking pin 7 and therefore the location means is connected to said axle for locking said pegs in said second operative position as set forth in the claim. It would have been obvious to one skilled in the art to combine the teachings of Slipp with the locking means of Allsop for the purpose of allowing an operative position and a storage position for optimum performance and efficient storage and to also prevent the inadvertent movement of the pegs which could result in damage to the bottles or articles which are drying.

Allowable Subject Matter

Claims 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each prior art reference cited with this action can be used to reject the claimed invention.
